Government Homesteads.

The United States Reclamation Service announces the availability for homestead entry some excellent irrigated farms in the wellknown Shostone irrigation proect near the Yellowstone Park in Wyoming and in the Huntley and Belle Fourche projects in Montana and South Dakota. Water is now ready for delivery to these farms, and under the new three-year homestead law a liberal inducement is accorded settlers in that they are permitted five months' leave of absence in each year. The cost of the water right is repayable in ten annual installments without interest.

In all of the foregoing districts there are already splendid transportation facilities, good roads, schools, stores, churches of practically all denominations and rural free delivery. For those with sufficient means to commence farming operations offers an excellent opportunity to work out one's independence and to develop a paying farm. Mr. Albert V. Leonard, Settlement Agent of the Reelamation Service, Federal Bldg., Chicago, has available for distribution several descriptive pamphlets concerning these projects and will be glad to furnish them upon request.
